Professional Profile

I am a technologist in training in IT Development and have completed an intensive 9-month training program to become a Developer. I have experience with the SCRUM methodology and a solid knowledge of programming languages such as JavaScript, TypeScript, CSS, HTML, and Python. My main interests are requirements analysis, software development, and web development. I have gained significant experience in project-based peer learning, which has improved my technical and soft skills. I am currently studying English at a B2 level and have strong assertive communication skills, effective teamwork, and an analytical approach to problem-solving, allowing me to adapt and contribute effectively in different work environments.

Programs / Software

- Python
- C
- JavaScript
- CSS

- Astro
- Django

Professional Experience

Mancii

Full Stack Developer – Capstone Project at Mancii 2024

Worked as a Full Stack Developer on the Capstone project at Mancii, focusing on developing and implementing key components for a web application. Utilized JavaScript, TypeScript, and agile methodologies to ensure efficient and effective project completion.

Responsibilities

- Designed and implemented key components using JavaScript and TypeScript.
- Collaborated with the team using agile methodologies (SCRUM/Kanban) to manage project tasks and deadlines.
- Created user interfaces and integrated backend services with Django and Astro, enhancing overall application functionality.

Achievements

- Successfully delivered the project ahead of schedule, meeting 100% of the client requirements.
- Facilitated effective team collaboration, contributing to a successful project outcome and positive feedback from stakeholders.

Freelance

Python Developer

June 2022 – February 2023

Developed an automation program to streamline business processes using Selenium and Python. The program automated repetitive tasks, improving efficiency and reducing manual effort.

Responsibilities

- Designed and implemented automated workflows using Selenium and Python to enhance operational efficiency.
- Wrote and maintained scripts to interact with web applications and perform automated tasks.
- Conducted thorough testing and debugging to ensure reliable and accurate automation processes.

Achievements

- Successfully reduced manual processing time by 60% through effective automation.
- Delivered a robust and scalable solution that met all client requirements and improved overall productivity.
- Received positive feedback from clients for delivering a high-quality automation solution on time.

Education

Universidad ECCI

Technologist in IT Development, Bogotá, currently deferred.

Holberton School

Software Foundations, 9 months, 2024.

Languages

- Spanish: Native
- English: B1
