Python Developer

PROFESSIONAL PROFILE

Studying to become a technologist in IT Development, with solid experience gained through an intensive 9-month developer training program. I have strong knowledge of the SCRUM methodology and expertise in JavaScript, TypeScript, CSS, HTML, Python, and automation tools like selenium and pynput. My interests include requirements analysis, software development, and web development. Through project-based peer learning, I have honed both technical and soft skills. I am also studying English at a B2 level, with strengths in communication, teamwork, and problem-solving, enabling me to adapt and contribute effectively in diverse work environments.

EXPERIENCIA PROFESIONAL

Mancii
Full Stack Developer Mancii June 2024 – July 2024

Contributed to the successful delivery of the Capstone project at Mancii as a Full Stack Developer, specializing in web application development with JavaScript, TypeScript, Node.js, Django, and Astro. Played a key role in designing and implementing core features while collaborating with cross-functional teams using Kanban to manage tasks and meet deadlines. Delivered the project ahead of schedule, achieving 100% client satisfaction through high-quality code and effective teamwork.

Freelance
Python Developer March 2023 – January 2024

Developed a robust automation program using Selenium, Python, and pynput to optimize business processes by automating repetitive tasks. Designed efficient workflows, wrote scalable scripts, and ensured reliable automation, resulting in a 60% reduction in manual processing time and a significant boost in productivity. Consistently delivered high-quality solutions, earning positive feedback from clients for meeting deadlines and exceeding expectations.

EDUCACIÓN

Technologist in IT Development
Universidad ECCI, Bogotá, currently deferred.

Software Foundations
Holberton School, Bogotá, July 2024.
